Report on ICT Enabled Tools for effective Teaching- Learning Process

Digital devices contribute to building digital fluency, increase student engagement, help teachers improve their lesson plans and facilitate personalized learning. Further, the use of ICT in education not only improves classroom teaching learning process, but also provides the facility of e-learning and distance learning to the learners. It served as a boon for the teachers as well as the students of Lala Rural College during the period of covid-19 pandemic, when the need aroused for distance teaching and learning. In one of the meetings of IQAC dated 18th November, 2020 the House agreed upon to reach maximum number of students through WhatsApp group and connect them with virtual classrooms being organized by each department. Accordingly, all HoDs and teachers have been sensitized and oriented to use virtual platforms like Google Meet, Zoom, Google Classroom, Cisco Webex, Google Forms and Gmail to organize classes and maintain evaluation process.

The college is well equipped with some basic digital infrastructural devices such as computers, digital smart boards, zerox machines, printers, projector, etc ^{Annexure -I}. During the period of pandemic the institution switched to some digital initiatives in teaching learning and evaluation. All the departments adopted the best ways to set up a virtual classroom for the students to facilitate maximum syllabus coverage and keep the students engage with the system. Some of the popular ICT tools, which have been used by the various departments to make the teaching learning experience more interesting, are WhatsApp messenger, Google Meet, Zoom, Gmail, etc ^{Annexure -II}. WhatsApp messenger has been mostly used to offer the handwritten notes whereas Google Meet and Zoom have been used to deliver lectures and have an interactive session with the students in virtual platform. Besides this, Gmail has been used as a medium to collect online assignments from the students as and when required. Online quizzes and unit tests have also been organized frequently for students using Google Forms ^{Annexure-III}.
